

Amendments to the Specification

The Examiner objected to the specification on the basis that sheets 2-9 have copy machine marks which render portions of the description illegible. A substitute specification is provided herein. The substitute specification does not contain any deleting, replacing, or adding of text. Only the copy machine marks were removed. Therefore, no marked up copy is necessary. Only a clean copy is attached. The substitute specification contains no new matter. Applicant requests that the Examiner withdraw the objection to the specification.
